FOR IMMEDIATE RELEASE

Scott R. Spiezle Honored by Mercer County Education Groups

TRENTON, New Jersey, March 13, 2006 – Scott R. Spiezle, president and CEO of Spiezle Group, Inc., was honored March 10th at the Third Annual Recognition Dinner sponsored by the Washington Education Foundation, Inc. and Partners Investing in Education. Nearly 200 guests were on hand at the Robert Wood Johnson Health and Wellness Center in Mercerville, New Jersey, for the event.

Washington Township Board of Education Vice President and Foundation Member Pat Foti said in his dinner remarks, “Washington Township had a vision for our children, our community, and our school district. We needed a partner: Scott Spiezle.” Foti added, “In business over 50 years, you would be hard pressed to visit a school district in our great state and not see a school project that has benefited from Spiezle Group’s imagination and expertise.”

The Foundation, in partnership with the Washington Township Board of Education and Partners Investing in Education, was instrumental in bringing to reality the new, 220,000-square-foot Washington Township High School, which opened in September 2005. The creation of the high school marked the first time Washington Township could educate its children within the township all the way through grade 12. Previously, children in the district went to high school in nearby Lawrence Township. Washington Township High School was designed by Spiezle Group, Inc.

“Washington Township High School represents very progressive thinking by school board members and community partners who risked criticism and worked tirelessly to move forward with the creation of the first high school for Washington Township,” said Spiezle in his remarks to the dinner guests. “While I am deeply honored to be presented with this special award, it’s the Washington Township Board of Education and their partners in progress who should be honored for making their dreams for the children of Washington Township come true. They proved that this community places education first.”

Since 1954, Spiezle Group, Inc. has been a leader in the design and construction of educational facilities, public and recreational venues, and corporate sites throughout the Northeast. The firm is currently at work on education and public facilities projects throughout New Jersey, including new and renovated facilities for the Clinton, Woodbridge, Florence, Lawrenceville, and Swedesboro school districts. Spiezle Group, Inc. is also providing master planning and architectural services for Rider University in Lawrenceville, New Jersey, and architectural services for the new Greater Trenton YMCA now under development in downtown Trenton, New Jersey.
